JACOB BAYNE – FOUND AMONG THE FRAGMENTS

I am fueled by a deep fascination for the human form and the subconscious information we can perceive through body language. For the past few years, I have dedicated myself to studying the human form, seeking to create honest yet abstract depictions that are instantly recognizable. Using a blend of ink, fine liner pen, and watercolors, I create emotionally charged forms that seep through layers on paper, leaving behind shadows and traces that reveal the essence of my subjects. Through my work, I aim to explore the intricacies of human movement, shadows, and shape, inviting the viewer to experience what lies beneath the surface. My art tells stories with fine lines, highlighting the complexities of the human mind and body through pictorial images.

'Found Among the Fragments' is Jacob's first exhibition of solely large-format works, featuring twelve mixed-media pieces. The works will be exhibited at DaRawNature Studio Gallery from the 5th of May to the 5th of June 2023.
